

May 17: SCBL Robotics Extravaganza

Saturday, **MAY 17, 10 am - 1 pm**, the robots are returning to the San Carlos Branch Library. In the library's lower parking lot, at the corner of Jackson & Golfcrest, 18 Robotic Clubs from local schools and San Diego neighborhoods will display, explain and demonstrate their robot creations. Guests will get to work some robots too. **Aguirre Tech** will also be there demonstrating the action of their drones. Interactive STEM activities and a robot craft will also be available on the corner lot. Hopefully special exhibits from

Miramar Air Base will be on site too.

Congratulations to the PATRIBOTS, the Patrick Henry Robotics Team! They annually score well at the Regional Robotics competitions.

Last year's Extravaganza was a great success. Robotics teams help young people develop skills in engineering, coding, and construction, plus BOTS are LOTS of FUN! Come learn how to get your children involved in this exciting career path.
