

## [May 15, 2-3 PM: OASIS – The Cognitive Revolution](#)

**May Speaker OASIS Speaker: Henry George, Engineer, Archaeologist & Geologist**

**About 30 thousand years ago, there was an explosion in the archaeological record of mobile and parietal art - figurines and cave painting. This evidence of symbolic behavior suggests that humans were now thinking differently from before. In this class, we'll explore how humans transformed from being just anatomically modern to being cognitively modern as well.**
