

**Sharon Meng** / San Carlos Branch Library display January 2025  
*Drew's Art Pals* group

Sharon Meng told us, "I began my artistic career as a bead artist and jewelry designer, including acceptance in the prestigious Bead Dreams show. I took up drawing and painting in 2015 after retiring from my career as a nurse midwife.

My life has always been shaped by color. I see gradations of color in everything around me.

Art is my attempt to express on paper the beauty of the world around me. I strive to develop a style that allows me to express not only the colors of nature but the rainbows I see in everyday objects as well. I enjoy doing portraits of people, exploring the geography of the face and capturing the beauty of flowers. "
