

# Drone Ownership 101

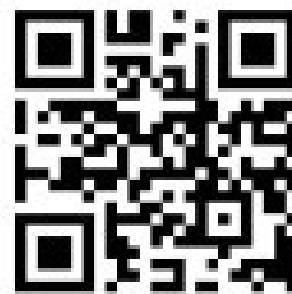

AERIAL & TECHNOLOGY SERVICES  
**AGUIRRETECH**  
WHERE SAFETY, SERVICE, AND INTEGRITY TAKE FLIGHT

Saturday November 16 • 10 am - 12 pm • San Carlos Library

Drones are becoming more affordable and many people will be giving them as gifts this holiday season. Most people are not aware of the responsibility of piloting a drone. Did you know...

- You need authorization to legally fly in national airspace?
- You can fly up to 400 feet above the ground recreationally?
- If your drone photos/videos are used commercially for someones benefit, you need an FAA Part 107 Certificate?

Flying a drone without adhering to FAA rules and regulations can lead to; serious financial liabilities, criminal, and civil penalties. At AguirreTech, we emphasize the importance of responsible piloting and are committed to guiding you through the essential FAA guidelines to ensure safe and legal drone operations.
