

Mad Science: Spin, Pop, Boom

Saturday, July 26 • 10:30–11:15 a.m.

To wrap up our summer reading program, we will use fire, foam, and music to explore the difference between physical and chemical reactions.

This is your chance to learn about endothermic and exothermic reactions in a thrilling, action-packed show. Sure to impress young scientists!

All ages.

**An interactive show
that is both fun
and educational!**
